COMPENG 2014 is intended to provide an international forum for scholars and professionals working on the latest developments in the fields of complexity science and its application in engineered systems, with special emphasis to electrical and communication networks, automatic control, distributed robotics, critical infrastructures, electronic and control systems, data collection and mining, management of large engineering systems and impacts and evolution of technology of engineered systems.

Accepted papers will be included in the conference proceedings. The proceedings will be available at the conference. Extended version of selected accepted papers will be considered for publication in major journals.

**Confirmed Keynote Speakers**

E. BOMPARD (JRC’s Institute for Energy and Transport)
S. VALVERDE (Universitat Pompeu Fabra)
A. SCALA (Universita’ degli Studi “La Sapienza”)

**Deadline for abstract submission: April 30th, 2014**

**Conference website:** [http://www.compeng2014.org](http://www.compeng2014.org)

**Contact email:** contact@compeng2014.org
